TD: Maven

<u>URL</u>: https://github.com/GuillaumeFroger/outils_dev.git

I. Projet Maven

Exercice 1 : Fait. Maven est bien installé.

Exercice 2 : Fait. Le répertoire maven « gf » a été généré.

```
[INFO] ------
[INFO] Using following parameters for creating project from Old (1.x) Archetype:
maven-archetype-quickstart:1.0

```

[INFO] ------

Exercice 6 : Nous avons installé Eclipse Neon et avons importé le projet Maven dans celui-ci.

Exercice 7 : Il est possible de modifier la classe « App » depuis Eclipse et de l'exécuter. Hello World!

```
Exercice 8: public class App
{
    public static int max(int a, int b){
        return a > b ? a : b;
    }

    public static void main( String[] args )
    {
        System.out.println( "max(5,4) : "+max(5, 4) );
    }
}
```

Exercice 9: L'appel de la méthode main affiche ainsi, max(5,4): 5

Exercice 10:

```
public void testApp()
{
    assertEquals(5, App.max(5, 4));
    assertEquals(5, App.max(4, 5));
}
```

```
Exercice 11: Test avec la commande: mvn test
```

Exercice 12: Ajout du tag « build » et configuration par rapport au projet courant.

Exercice 13 : Construction de la release « marelease » avec la commande : mvn package

Exercice 14: Test de la release avec : java -jar target/marelease.jar

```
r2d2@ubuntu:~/Desktop/outils_dev/ProjetsMaven/gf$ java -jar target/marelease.jar
max(5,4) : 5
```

Exercice 15:

```
public static int max(int a, int b){
    //return a > b ? a : b;
    return a; // Erreur volontaire
}
```

Exercice 16 : La release ne peut plus être construite.

Exercice 17: Fait.

II. Open CSV

Exercices 18, 19: Fait.

```
<dependency>
    <groupId>com.opencsv</groupId>
    <artifactId>opencsv</artifactId>
        <version>3.9</version>
</dependency>
```

Exercices 20, 21, 22:

```
try{
    int monmax=0;
    CSVReader csvReader = new CSVReader(new FileReader("data.csv"));
    List content = csvReader.readAll();
    String[] row;
    for (Object object : content) {
        row = (String[]) object;
        //System.out.println(row[0] + " # " + row[1] + " # " + row[2]);
        try{
            monmax=max(monmax, Integer.parseInt(row[0]));
            System.out.println("Nombre lu : "+Integer.parseInt(row[0]));
        catch (Exception e) {};
    }
    csvReader.close();
    System.out.println("Max : "+monmax);
  catch(FileNotFoundException e){}
  catch(IOException e){}
```

Exercice 23: Une exception est levée car, la dépendance « opencsv » n'a pas été pris en compte r2d2@ubuntu:~/Desktop/outils_dev/ProjetsMaven/gf\$ java -jar target/marelease_openCSV.jar max(5,4) : 5

Exception in thread "main" java.lang.NoClassDefFoundError: com/opencsv/CSVReader at gf.App.main(App.java:27)

Caused by: java.lang.ClassNotFoundException: com.opencsv.CSVReader at java.net.URLClassLoader.findClass(URLClassLoader.java:381) at java.lang.ClassLoader.loadClass(ClassLoader.java:424) at sun.misc.Launcher\$AppClassLoader.loadClass(Launcher.java:331) at java.lang.ClassLoader.loadClass(ClassLoader.java:357) ... 1 more

Exercice 24 : En ajoutant le plugin maven-assembly-plugin dans pom.xml, la construction et l'exécution du projet fonctionnent. (dans le cas où les tests unitaires sont vérifiés)

III. Commons Collection

Exercice 26 : Ajout de la classe CollectionUtils dans pom.xml

```
<dependency>
  <groupId>org.apache.commons</groupId>
  <artifactId>commons-collections4</artifactId>
  <version>4.1</version>
</dependency>
```

Exercices 27, 28 & 29:

Après avoir importer « CollectionUtils », voici le code que nous avons adapté pour prendre en compte le prédicat sélectionnant les nombres inférieurs à 50.

```
public static void main( String[] args )
    System.out.println( \max(5,4) : +\max(5,4));
    try{
        int monmax=0;
        CSVReader csvReader = new CSVReader(new FileReader("data.csv"));
        List<String[]> content = csvReader.readAll();
        Vector<String> out = new Vector<String>();
        CollectionUtils.select(content, new Predicate() {
                public boolean evaluate(Object o) {
                    String[] row = (String[]) o;
                    return Integer.parseInt(row[0]) < 50;</pre>
                    catch (Exception e) {return false;}
                }
                                                         }, out);
        System.out.print("OUT:");
        String[] row;
        for (Object object : out) {
            row = (String[]) object;
                monmax=max(monmax, Integer.parseInt(row[0]));
                System.out.print(" "+Integer.parseInt(row[0]));
            catch (Exception e) {};
        }
        csvReader.close();
        System.out.println("\nMax : "+monmax);
      catch(FileNotFoundException e){}
      catch(IOException e){}
}
```

Dans data.csv, nous avons volontairemnt ajouter 4 entiers inférieur à 50.

En résultat, nous avons la liste filtrée d'éléments et un Max de 42 qui est l'entier le plus élevé inférieur à 50. max(5,4) : 5

OUT: 3 42 14 9 Max : 42

Exercice 30:

```
CSVWriter writer = new CSVWriter(new FileWriter("data-filtered.csv"));

for (Object object : out) {
    row = (String[]) object;
    writer.writeNext(row);
}
writer.close();
```

Ce « filtreur » écrit les listes filtrées par le prédicat dans le fichier créé « data-filtered.csv »

	Standard	Standard	Standard	Standard	Standard	Standard	Standard	Standard	Standard	Standard	Stand
1	3	FL	CLAY COUNTY	0	129913.27	0	0	129913.27	101692.86	0	0
2	42	FL	HILLSBOROUGH COUNTY	146326.5	146326.5	146326.5	146326.5	146326.5	192141.91	0	0
3	14	FL	PINELLAS COUNTY	0	141157.77	0	0	141157.77	190248.49	0	0
4		FL	PINELLAS COUNTY	0	1454115.38	0	0	1454115.38	1569816.43	0	0

Exercice 31:

En regardant les données brutes du fichier « data-filtered.csv », nous pouvons voir que tous les éléments disposent de guillemets indésirables dans notre cas.

```
"3","FL","CLAY COUNTY","0","129913.27","0","129913.27","101692.86","0","0","0","
"42","FL","HILLSBOROUGH COUNTY","146326.5","146326.5","146326.5","146326.5","146326.5","146326.5","146326.5","147","FL","PINELLAS COUNTY","0","141157.77","0","0","141157.77","190248.49","0",
"9","FL","PINELLAS COUNTY","0","1454115.38","0","0","1454115.38","1569816.43","0","0
```

Pour résoudre le problème, nous allons spécifier au constructeur du CSVWriter qui nous ne voulons pas de cette transformation par défaut via la constante symbolique NO_QUOTE_CHARACTER

```
CSVWriter writer = new CSVWriter(new FileWriter("data-filtered.csv"), ',', CSVWriter.NO_QUOTE_CHARACTER);
```

```
3,FL,CLAY COUNTY,0,129913.27,0,0,129913.27,101692.86,0,0,0,0,30.079785,-81.706865,Res 42,FL,HILLSBOROUGH COUNTY,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5,146326.5
```

Exercice 32: Fait.
